Fire Weather Low RH / Wind / Dry T-Storms	Inland/ Southern						
Thunderstorms Wind / Hail / Tornadoes		Inland (Sierra)					
Heat	All Areas	All Areas	Southern	Inland/ Southern	Inland/ Southern	Inland/ Southern	Inland/ Southern
Cold							
River Flooding							
Wind							
Heavy Rain Flash Flooding / Debris Flow							
Snow							
Coastal Flooding							
Risk Levels	Little to No	ne IV	linor	Moderate	Majo	or	Extreme

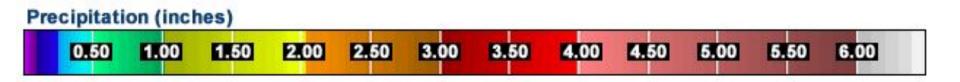

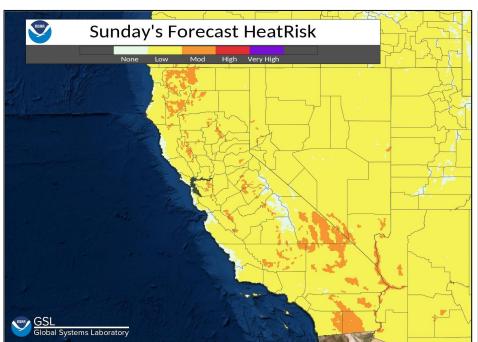

- Elevated fire weather conditions are expected across some mountain and foothill locations across the state each afternoon through the week, as winds remain locally breezy
- Cooler temperatures continue through Monday, before hotter conditions return for the middle and latter portions of the week, when moderate to locally high heat risk impacts will redevelop
 - Some daily record high temperatures are possible for the latter half of the week
- Isolated showers and thunderstorms are possible across the northern Sierra on Monday;
 otherwise, dry weather is expected across the state through much of the week
 - A few storms could return to interior Southern Region late in the week, but confidence in this possibility is currently low

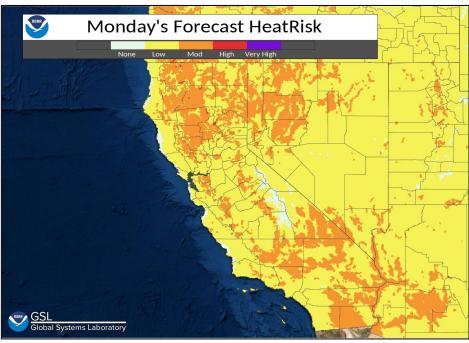

Important Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms will produce locally much higher rainfall amounts.

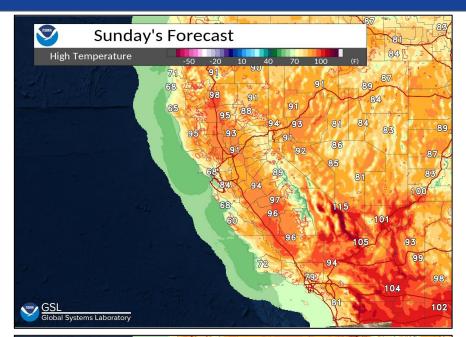

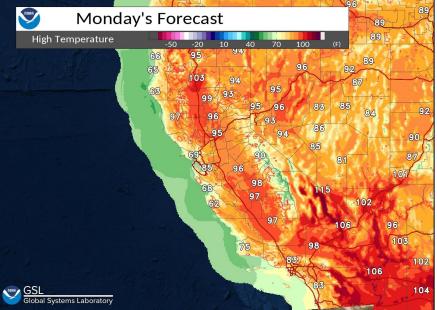

Green	Level 0	No Elevated Risk
Yellow	Level 1	Low Risk for those extremely sensitive to heat, especially those without effective cooling and/or adequate hydration
Orange	Level 2	Moderate Risk for those who are sensitive to heat, especially those without effective cooling and/or adequate hydration

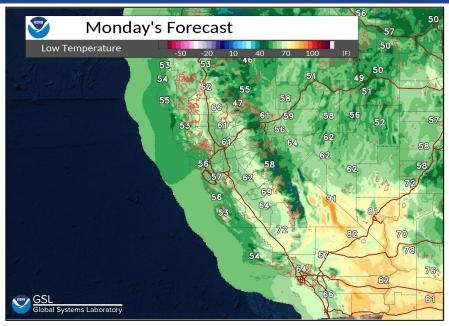

Red	Level 3	High Risk for much of the population, especially those who are heat sensitive and those without effective cooling and/or adequate hydration
Magenta	Level 4	Very High Risk for the entire population due to long duration heat, with little to no relief overnight

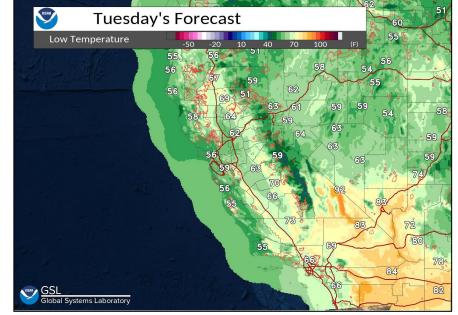

Fri-Sat High/Low Temperatures

Weather Outlook (6-14 Days)

Regional Operations Center
Western Region
Sunday, August 28

6-10 Day Outlook (September 2 – September 6)

Temperatures

Above normal temperatures are strongly favored statewide

Precipitation

 Below normal precipitation is favored across the northern half of the state, with above normal precipitation favored across far southern California

8-14 Day Outlook (September 4 – September 10)

Temperatures

Above normal temperatures are strongly favored to persist across the state

Precipitation

 Near normal precipitation is favored for the northern half of the state, while above normal precipitation is slightly favored for southern California

Risk Assessment Matrix

Impact Level Definition

- 1. Impactful weather is not expected.
- 2. Potential threat to lives and property if no/incorrect actions are taken.
 - a. Localized impacts on commerce possible.
 - b. Includes events that occur frequently.
- 3. Potential threat to lives and property if no/incorrect actions are taken.
 - a. Impacts on commerce possible.
 - Includes events that occur a few times per year.
- 4. Actions likely needed to save lives and/or property.
 - Significant impacts to commerce possible.
 - b. Includes events that occur infrequently.
- 5. Actions required to save lives and/or property.
 - Significant and extended impacts to commerce.
 - b. Includes exceptionally rare events.
